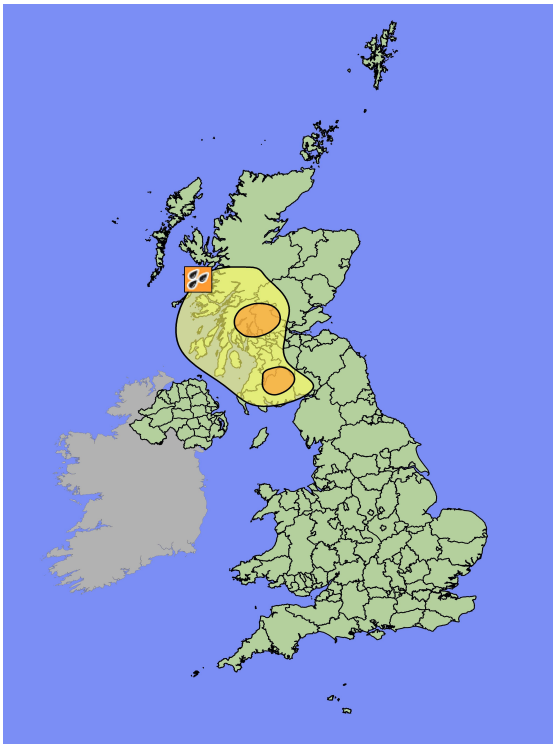
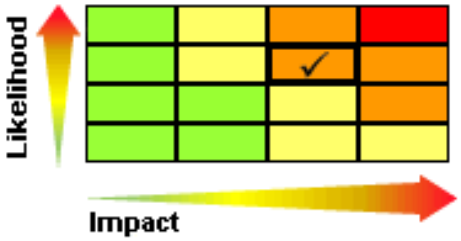
National Severe Weather Warning Service





Chief Forecasters Assessment
Another area of rain is expected to move in from the Atlantic later on Wednesday and overnight into Thursday. Rainfall totals of 20 to 40 mm are likely in quite a short period, with locally 50 mm or so possible on some southwest facing slopes.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **18:00 on Wed, 30th Nov 2011** until **06:00 on Thu, 01st Dec 2011**

Rain will become heavy and persistent during Wednesday evening and will last well into Thursday morning. This will fall onto already saturated ground. The public should be aware that as a result of the heavy rain, there is a risk of localised flooding and some travel disruption. This risk is highest within the areas coloured amber on the graphic. The main rain area will clear from the west before dawn on Thursday.
